

**THE LANDING COMMUNITY ASSOCIATION, INC.**  
**SOLAR ENERGY DEVICES AND ROOFING MATERIALS POLICY**

STATE OF TEXAS                    §  
  §  
COUNTY OF MONTGOMERY       §

WHEREAS, the property encumbered by this Solar Energy Devices and Roofing Materials Policy is that property restricted by the Declaration of Covenants, Conditions and Restrictions for The Landing, recorded in the Official Public Records of Montgomery County, Texas, under Clerk’s File No. 2022051250, as same has been or may be amended from time to time (the “Declaration”), and any other property which has been or may be subsequently annexed thereto and made subject to the authority of The Landing Community Association, Inc. (the “Association”); and

WHEREAS, any reference made herein to approval by the Architectural Review Committee (the “ARC”), means prior written approval by the ARC.

NOW THEREFORE, pursuant to the authority granted in Sections 202.010 and 202.011 of the Texas Property Code, the Board of Directors (the “Board”) hereby adopts this Solar Energy Devices and Roofing Materials Policy (the “Policy”), which shall run with the land and be binding on all owners and lots within the subdivision. This Policy replaces any previously recorded or implemented policy that addresses the subjects contained herein.

**I.       SOLAR ENERGY DEVICES**

Pursuant to Texas Property Code §202.010, solar energy devices, including solar panels, shall be restricted in the following manner:

A.     Prohibited Solar Energy Devices

Solar energy devices, as referred to herein, shall be defined as set forth in the Texas Tax Code §171.107. Solar energy devices are prohibited in the following circumstances:

1.     Solar energy devices that have been adjudicated by a court to be a threat to public health or safety or to violate a law;
2.     Solar energy devices that are located on property owned or maintained by the Association;
3.     Solar energy devices that are located on property that is owned in common by the members;
4.     Solar energy devices that are located on the owner’s property, other than:
  - a.     On the roof of the dwelling or another permitted structure;

- b. In a fenced yard or patio owned and maintained by the owner;
- 5. Roof-mounted solar energy devices that extend higher than or beyond the roofline;
- 6. Subject to Item 7 below, if roof mounted, solar energy devices that are mounted in an area other than the back of the home;
- 7. Roof-mounted solar energy devices that are located in an area *other* than an area designated by the Association, unless the alternate location increases the estimated annual energy production by more than ten percent (10%) above the area designated by the Association (as determined by a publicly available modeling tool provided by the National Renewable Energy Laboratory);
- 8. Roof-mounted solar energy devices that do not conform to the slope of the roof and have a top edge that is not parallel to the roofline;
- 9. Roof-mounted solar energy devices that have frames, support brackets, or visible piping or wiring containing colors other than silver, bronze, or black tones;
- 10. Solar energy devices that are located in a fenced yard or patio that are taller than the fence;
- 11. Solar energy devices that, as installed, void material warranties; and
- 12. Solar energy devices that were installed without prior approval by the Association or ARC.

If the proposed solar energy devices do not fall within one of the above-prohibited categories, the Association or ARC may not withhold approval of the installation of solar energy devices unless the Association or ARC determines in writing that placement of the solar energy devices, as proposed by the owner, constitutes a condition that substantially interferes with the use and enjoyment of land by causing unreasonable discomfort or annoyance to a person of ordinary sensibilities. The written approval of the owner's proposed location by all owners of adjoining property constitutes prima facie evidence that such a condition does not exist.

## II. ROOFING MATERIALS

Pursuant to Texas Property Code §202.011, the installation of the following roofing materials is permitted:

- 1. Wind or hail resistant roofing materials;

2. Materials that provide heating and cooling efficiencies greater than those provided by customary composite shingles; or
3. Materials that provide solar generation capabilities.

The above-enumerated acceptable materials, when installed, must:

1. Resemble the shingles used or otherwise authorized for use within the subdivision;
2. Be more durable than, and of equal or superior quality to, the shingles authorized for use within the subdivision; and
3. Match the aesthetics of the property surrounding the owner's property.

### **III. ARC APPROVAL**

An applicant's submission of plans must include a completed application for ARC review, a site plan and/or roof plan showing the proposed location of the improvement, along with pictures showing the location of the modification and the manufacturer's brochures or a sample of material, if applicable. The color of the materials being used in relation to the roof or house color, the visibility from public streets and neighboring properties/common areas, and any noise created and/or light reflected are of specific concern to the Association and the ARC.

Any installation not in compliance with this Policy will be considered a violation of the dedicatory instruments governing the subdivision.

This Policy does not apply to property that is owned or maintained by the Association.
